Instacart

50 Beale Street
Suite 600
San Francisco, CA 94105

Dear sir or madam:

I am excited to be applying for the Director of Engineering position at Instacart. I believe my experience with growing engineering organizations from the early stages onward would be a significant asset to your team, and I would relish an opportunity to build and grow engineering teams at a company like Instacart that is making the lives of ordinary people so much easier, by giving them back time in their already-hectic days.

I have worked with a wide variety of stakeholders in my career. I am comfortable interacting with C-level execs, and have managed both engineers and engineering managers. I have worked as an individual contributor up and down the stack, building frontends in HTML/CSS/Javascript, and backends in JavaScript/Ruby/Python/C#. I am well-versed in foundational technologies such as AWS, Linux, Git, containers, RDBMSs. My entire career has been centered on solving practical problems for end users, always with an eye toward learning something new.

Thank you sincerely for your time and consideration. I'm looking very much forward to hearing more about the Director of Engineering position, and how it fits in with the growth of the business at Instacart.

Best regards,

MDE
